"SoundRecover™" Technology at Niceville Hearing Center

Now you can add **UNDERSTANDING** to your hearing with "SoundRecover™"

Numerous research studies have clearly proven that extended bandwidth alone is not sufficient to provide access to the high-frequency sounds essential for speech understanding. In addition to a broadband frequency response, "SoundRecover™" ensures that all the sounds of life are clearly audible. Niceville Hearing Center has had some very successful outcomes partnering with the world's largest manufacturer of hearing aids. The manufacturer Phonak® uses extended bandwidth to take advantage of natural sound amplification to the physical limits of the receiver and sound delivery system. When the hearing professionals at Niceville Hearing Center program the sophisticated non-linear frequency compression algorithm called "SoundRecover™" into the Patient's hearing aid, it gently compresses and shifts high frequencies ensuring that the full spectrum of sound is audible with a natural sound quality.

innovative solutions in the field of hearing. Phonak® has a hearing aid for all kinds of hearing loss, all lifestyles, ages and budgets.

also know that too many people wait years, even decades, before getting treatment – either unaware

of the extent of their hearing loss or too afraid to confront it – losing out on so much of life."

Our Niceville Hearing Center PROMISE:

OUR NICEVILLE HEARING CENTER PROMISE – We're aware of the needs of people who rely on our knowledge, our ideas and support. With our creative approach to overcoming the limits of technology, we affiliate with only those hearing aid manufacturers that produce solutions that support people with hearing and understanding challenges. The most important element of a high quality of life is speech recognition. Understanding people clearly – even in difficult hearing situations with a lot of noise – continues to be our greatest challenge. Many of our Patients want an optimized solution specifically for these situations. They want and need a solution that will reconnect them with people close to them.

Dr. Rebeck and Grant Williams are available to answer all your questions and concerns. There is no question that is too basic. "We know that unaddressed hearing loss seriously undercuts a person's quality of life and has a tremendous negative impact on relationships," says Dr. Rebeck. "We

"All my experiences at the Niceville Hearing Center have been life changing.

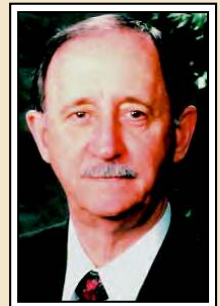

Niceville Hearing Center is a beautifully maintained medical suite located in the Twin Cities Medical Plaza and offers a clean, caring environment where everyone with a hearing loss will receive professional patient care by a highly trained staff.

I can truly say nice things about Niceville Hearing Center, because they've been in the Niceville area almost as long as I've been 'Mayor Boggy'. Grant Williams, Owner of Niceville Hearing Center, takes care of other members of my family and they also are very pleased with the passionate follow up care they receive. If you or any of your loved ones need help with their hearing, I would suggest visiting Niceville Hearing Center located near the Twin Cities Hospital.

I know the Phonak® hearing aids that I'm wearing now help me tremendously while attending the many meetings and public appearances required of a Mayor."

#1 » **SoundRecover®** - it benefits Patient's with a loss described as a moderately-severe to severe hearing loss. *Research Study by Dr. Hugh J. McDermott, PhD.*

#2 » **Hearing Loss is Linked to Dementia** - Seniors with hearing loss are significantly more likely to develop dementia over time than those who retain their hearing, a study by Johns Hopkins and National Institute on Aging researchers suggests. "Researchers have looked at what affects hearing loss, but few have looked at how hearing loss affects cognitive brain function," says study leader **Frank Lin, M.D., Ph.D.**, assistant professor in the Division of Otolaryngology at Johns Hopkins University School of Medicine.
